

**ARCTIC CAT®**  
SHARE OUR PASSION.™

## CREATING THE ULTIMATE OFFROAD RIDING EXPERIENCE.

Welcome to the new Arctic Cat. Like you, we are enthusiasts who are empowered by the great outdoors. We are motivated by our passion for hard work and the pursuit of adventure. At Arctic Cat we are committed to building products and providing services that deliver the experience enthusiasts expect from us. This commitment is engineered into our engines, our chassis, our suspensions, our gear and our accessories. We wear our pride on our sleeves and across our chests — a statement to the world that everything we do is done with purpose and precision. That's how we create the ultimate offroad riding experience for fellow enthusiasts who Share Our Passion.™ We would like to invite you to come ride with us.

**ARCTICCAT.COM** Arctic Cat's online HQ. Everything from machines and specs down to the accessories and gear you need to take on the world on four wheels.

ATVs and ROVs can be hazardous to operate. Improper use can cause severe injury or death. Each rider must wear a seat belt (on ROVs), an approved helmet, eye protection and protective clothing; use handholds/steering wheel and stay completely inside the vehicle. ROV operators must have a valid driver's license (no operators under age 16) and all riders must be able to sit with their back against the seat, feet flat on the floor and hands on handholds/steering wheel. Each rider must read and understand the operator's manual before riding. Follow all instructions and warnings. Avoid abrupt maneuvers, paved surfaces, hard acceleration when turning, and sidehilling; slow down before entering a turn. Never engage in stunt driving. Avoid excessive speeds and be particularly careful on difficult terrain. Never carry a passenger in the cargo box or exceed seating capacity on an ROV; never carry a passenger on a single-rider ATV. ATVs are recommended only for users over 12 years old. Only ride an ATV that is right for your age. Supervise riders younger than 16. Never operate on public roads unless designated for off-highway vehicle access — collisions with cars and trucks can occur. Never drive or ride under influence of alcohol or drugs. Do not shoot from or lean firearms or bows against the ATV or ROV. Arctic Cat recommends that all riders take a training course. For safety or training information in the U.S., call the ATV Safety Institute at (800) 887-2887. In Canada, please contact the Canada Safety Council at (613) 739-1535 or see your dealer. For ROV training visit <http://rohva.org>. Along with concerned conservationists everywhere, Arctic Cat urges you to "Tread Lightly" on public and private lands. Ride only on designated areas or trails. Preserve your future riding opportunities by showing respect for the environment, local laws and the rights of others when riding. All materials and specifications are subject to change without notice. SIDE BY SIDES AND ATVS

# YOU **vs** OFFROAD

Some models shown with accessories.

# TAKE ON THE WORLD

Arctic Cat® Side by Sides and ATVs are designed and engineered to give you the edge. Whether you're hauling fence posts, climbing a rocky mountainside, up to your headlights in mud or staying dry on a smooth trail, there's an Arctic Cat machine for you. The 2016 lineup ushers in the new Alterra™ redesigned to be the ultimate ATV. The HDX™ packs a new take-on-anything body style, while our Ready 2 Roll™ accessory packages offer everything needed to get the job done. It's you vs. the world out there. Get ready to win.

# SIDE BY SIDE TECHNOLOGY

## WILDCAT™

### POWER

A 951cc (X models), H2, liquid-cooled V-Twin EFI engine provides the efficiency advantages of 4 valves per cylinder with its Pentrof Hemispherical Combustion Chamber. Oxygen enters the machine through a 50mm throttle body, and leaves through a 2-into-1 tuned ceramic-coated exhaust with a new pipe and closed loop EFI system, improving your fuel efficiency. Each H2 engine is assembled at Arctic Cat's state-of-the-art St. Cloud, Minnesota, facility. Trail and Sport models are powered by 700cc, 4-stroke, twin cylinder engines.

### TEAM RAPID RESPONSE CLUTCH

The rugged TEAM® Rapid Response™ is a perfect complement to each Wildcat's continuously variable transmission (CVT). Thanks to a lightweight design that creates minimal friction, power transfer is effortless. Shifts occur automatically and instantly in response to the vehicle no matter how hard you hammer the throttle. Ride on.

### 5-LINK REAR SUSPENSION

Five linked rods work as one to keep the tire's contact patch flat throughout all 18" of travel by reducing camber and axle plunge. 13" of ground clearance keeps you above almost any terrain below.

### PERFORMANCE SHOCKS

The Wildcat X gets the agile 2.5" JRi EXC-1 with compression adjustment while the X Limited gets the impressive Elka® Stage 5 shocks with high and low speed compression dampening plus rebound adjustment, delivering professional racing performance.

### HAYES BRAKES

Wildcat X and Sport models get the impressive Twin Piston Calipers by Hayes.

### LED LIGHT SHOW

Clocking in at 216 lumens on low, 384 on high, the Wildcat X comes equipped with dual LED headlights and taillights.

**SURLYN BODY PANELS** A redesign of the HDX XT™ prompted the use of super tough Surlyn® by DuPont,™ a resilient, resin-based material borrowed from Arctic Cat's time-tested snowmobile technology. Surlyn requires no painting and is scratch-resistant.

## DASH SHIFTER AND TILT STEERING

The HDX's dash features infinitely adjustable tilt steering, a large glove box and a small center cubby for gloves, snacks, drinks, maps — the important stuff. A dash shifter with park keeps the power at your fingertips.

# HDX

**INDUSTRY-LEADING STORAGE** The automotive-style hood opens from the front, just like your truck, making it easier to gain access to the massive 22.4-gallon underhood storage box, radiator and brake fluid reservoir. Use the hinge lever, lock the hood in the upright position and take it all in. Need extra storage? Compartments in front of the rear wheels can carry that for you, not to mention the massive glove box.

**CARGO BOX CONVERSION** The HDX's 56" x 42.5" cargo box features 1,000 lbs. and 2,380 cubic inches of payload capacity. If you're hauling a wider load, the 2-in-1 tilting cargo box converts to a flatbed in minutes — wide enough to fit a full-size pallet.

## READY TO BEAR WEIGHT

As your load gets heavier, give your pressure-adjustable rear FOX FLOAT® shocks a pump.

## LED LIGHT BAR

The LED light bar and halogen headlights team up to provide a brighter beam and modern look.

# ATV TECHNOLOGY

## ALTERRA

### PICK YOUR POWER

If you want to talk about options, the new Alterra is available in 700 (695cc), 550 (545cc), 500 (443cc), 450 (443cc) EFI, as well as the 400 (366cc) models. Each engine's liquid cooling system keeps these SOHC, 4-stroke, 4-valve-powered machines muscling through everything, while the 400's air/oil cooling system refuses to slow you down.

### HALOGEN HEADLIGHT & LED LIGHT BAR

With the Alterra, luxury comes standard from front to back. Literally. The front features an LED light bar that shines with pure style, day in and night out while the back gets LED tail lights.

### 11" OF GROUND CLEARANCE / 10" OF SUSPENSION TRAVEL

Excellent ground clearance, immense suspension travel, a rear sway bar and a softer spring rate all combine to soak up ruts the size of fault lines.

### ON-THE-FLY 2WD/4WD WITH FRONT DIFFERENTIAL LOCK SWITCH

Arctic riders prefer to be in control with their on-the-fly 2WD/4WD. Tackle more rugged terrain by locking the front differential with a flick of the switch.

## ERGONOMICS AND TURNING RADIUS

The new Alterra chassis features a more upright sitting position, delivering improved ergonomics and reducing handling effort. These machines are indeed more maneuverable, with an improved turning radius, while requiring a shorter reach from the rider.

New ergonomic body position  
Old body position

## REAR STORAGE COMPARTMENT

This 1.44-gallon rear storage compartment is a much-appreciated addition. Plus it's water-resistant.

## ROUND IT OUT WITH RIMS

The Alterra's one-piece, double-spoke cast-aluminum rims are lightweight, lending themselves to the machine's all-terrain state of mind. They also look rugged and mean, but that's just a given.

## HAYES BRAKES

The Alterra takes braking to the next level with Hydraulic Disc Brakes by Hayes.

## SPEEDRACK II

14 SpeedLock™ attachment points

**SPEEDRACK® II** Constructed from high-grade rubberized, impact-resistant material on top of a layer of reinforced steel, you can pile heavy loads and freezing temperatures on it without it breaking down. It also features 14 SpeedLock attachment points for easy-on, easy-off accessories.

## SPEEDLOCK™

This durable, cast-aluminum drop-in system quickly attaches with easy-to-use SpeedLocks, and unlocks in one click for fast removal. Simply the fastest and strongest ATV accessory system in the industry.

# WILDCAT X

## NOTHING'S AS WILD

The Wildcat X, also available in Limited and 4-up packages, stays true to its rugged roots with TEAM Rapid Response clutch and a 951cc, 90+ HP, V-Twin, torque-tuned motor to match.

Duro Power Grip tires and JRi ECX-1 adjustable shocks tackle the trail with ease. Its full-perimeter frame boasts a low center of gravity with a 40/60 weight distribution.

The X Limited is even wilder. The molded roof and full doors come standard, as do front and rear bumpers and beadlock aluminum rims. Elka Stage 5 shocks with high and low speed compression dampening gives you the professional performance only Arctic Cat can deliver.

GO TO [ARCTICCAT.COM](http://ARCTICCAT.COM) TO GET ALL THE SPECS FOR YOUR MACHINE

## SUSPENSION TRAVEL

Our best-in-class suspension gives you 17" of travel up front and 18" in the rear, thanks to our 5-Link Rear Suspension. 13" of ground clearance lets you traverse almost any terrain.

## POUND-FOR-POUND PERFORMANCE

Legendary performance is what makes Wildcat Sport, XT and Limited models purr. Trail or off-trail, each features a low center of gravity and high power-to-weight ratio, giving you better acceleration, climbing ability and top-end speed, so you can ride confident. Standard packages have a 60" wheel stance and high-performance suspension. The XT gets electronic power steering (EPS) plus packs nitrogen-charged JRI ECX shocks. The Limited boasts Elka Stage 5 shocks with high/low compression dampening and EPS. To top it off, Carlisle® Trail Pro® 4-ply tires devour tough terrains as you ride inside full doors.

## THE PERFECT FIT

The Wildcat Trail has been cleared for trail gates and tailgates alike. Impossibly lean and incredibly mean at just 50" wide, this 700 twin engine-powered machine fits in the back of your pickup and through certified trail entries. The 40/60 weight distribution, compact powertrain design and low center of gravity team up with 10" of ground clearance and 10.5" of rear suspension travel for amazing flat cornering and terrain coverage. The XT features electronic power steering, custom aluminum wheels and automotive-style paint.

## MAKE HARD WORK EASY

The HDX XT is the ultimate working machine, available in a 700 and 500 model, and ready to take on the tougher tasks. New in 2016 is the bring-it-on body style and automotive-style hood. The payload is the payoff, with an industry-leading tilting 2-in-1 cargo box converting to a flatbed for 1,000 lbs. of carrying capacity on top of rugged FOX FLOAT coil-over adjustable shocks (700 only). Side and underhood compartments store your work essentials, while tilt steering and the

three-person bench seat are perfect for when your cargo includes a couple extra helping hands.

### CLASS-DOMINATING STORAGE CAPACITY

The automotive-style hood opens from the front, just like your truck, making it easier to gain access to the massive 22.4-gallon underhood storage box. Compartments in front of the rear wheels can carry everything else for you, not to mention the massive glove box.

# PROWLER

## ALWAYS ON THE PROWL

The Prowler® 1000 XT and 700 XT are the epitome of versatility. Electronic power steering (EPS) and the infinitely adjustable tilt steering column make driving anywhere second nature. The 2WD/4WD with locking front differential lets you shift on the fly. The rear cargo box hauls up to 600 lbs., while the rear 2" receiver makes pulling 1,500 lbs. look easy. Scratch-resistant Surlyn body panels let you get dirty while keeping the paint job clean.

GO TO [ARCTICCAT.COM](http://ARCTICCAT.COM) TO GET ALL THE SPECS FOR YOUR MACHINE

## POWER 1000 / 700

Every aspect of the Prowler gives you variability in the way you use it, right down to the engine. The 1000's category-dominating performance comes courtesy of its V-Twin, 951cc, H2 power plant. The 700 comes standard with the 695cc, H1 EFI engine. Both were built by passionate riders-turned-workers in our St. Cloud, Minnesota, facility.

# ALTERRA

## FULL-SIZED, FULLY LOADED

Meet the new Alterra — the recreational ATV where Duramatic™ automatic transmission, on-the-fly 2WD/4WD with locking front differential, an Arctic Cat-built H1 engine for superior power, electronic fuel injection (EFI) and liquid cooling come standard. Not to mention the Power Sport digital gauge. The XT package boasts performance-calibrated suspension, EPS and aluminum rims, while a halogen headlight with an LED light bar guides the way after the sun sets. All-terrain vehicles should be built for all terrains, and that's exactly why we built the Alterra.

# ALTERRA MID-SIZED

**BUILT FOR OUTSIDE.  
BUILT TO OUT RIDE.**

We took the brand-new body style and endless capabilities of the full-sized Alterra, and adapted them for the more compact 450/400 mid-sized models. Part workhorse, part warrior, these machines are more nimble, lightweight and versatile than the competition. Everything from the Duramatic automatic transmission, trail-tuned independent suspension, on-the-fly 2WD/4WD and rear 2" receiver, all the way down to the Kenda® Pathfinder tires on powder-coated rims that give you 10" of ground clearance. Needless to say, we didn't mess around with these newly styled Alterras.

GO TO [ARCTICCAT.COM](http://ARCTICCAT.COM) TO GET ALL THE SPECS FOR YOUR MACHINE

# POWER

## 450 / 400

Compact in size, huge in capability. As quick, light and agile as a Cat™ can be, the Alterra Mid comes in both a 450 and 400 engine model. Just like the full-sized Alerras, the 450 and 400 are SOHC, 4-stroke, 4-valve machines, unafraid to show what they're made of.

# 400

COLOR OPTIONS

# 450

COLOR OPTIONS

# 1000 XT

## TRAIL-TESTED PERFORMANCE

The 1000 XT is revered for its 951cc, Arctic Cat-built H2 EFI engine's performance, as well as its durability and proven trail record. To beef up an already impressive list of features, these machines come standard with electronic power steering (EPS), ride-in front and rear suspension, an on-machine SpeedRack and easy-access storage. You also get Maxxis Bighorn 2.0 tires wrapped around aluminum rims, which pair nicely with the toughness of that automotive-style paint.

# TBX 700

## YOUR NEW WORKHORSE

Throttle through your workday with the 695cc, H1 EFI engine — built at our St. Cloud, Minnesota, facility — plus electronic power steering (EPS). Haul 300 lbs. in the tilting rear cargo and 100 more on the SpeedRack up front. If that wasn't enough, side storage boxes in front of both rear wheels carry any extra cargo you have. The 700 TBX™ is top-to-bottom utility, while refusing to slow down in the performance department.

# MUDPRO™ 700 LTD

## GO AHEAD, GET DIRTY

The MudPro is made for mud. Plain and simple. Huge 28" Maxxis Zilla tires definitively mounted to beadlock aluminum rims give you 14" of ground clearance. The on-the-fly 2WD/4WD with front differential lock powered by a CVT transmission with engine braking system muscles the machine through mud and dirt.

Looking to get extreme? The elevated snorkel air intake pumps clean air to the engine. Fresh air is also channeled to the clutch, keeping the CVT belt dry and cool.

# XC 450

## THE EXTREME SPORT

The XC 450 features the high-performance 443cc, 4-stroke, H1 engine with a potent 4-valve design. The dual A-arm suspension commands 10" of ground clearance and 7" of travel. On-the-fly 2WD/4WD adapts to terrain and riding style. On steep grades, the engine-braking system complements powerful hydraulic disc brakes.

COLOR OPTION

On-the-fly 2WD/4WD

# 500

## BIGGER BANG FOR FEWER BUCKS

Power and efficiency are key, and our best-selling 500 is thriving in both departments. The 443cc SOHC, 4-valve engine with EFI can outlast, outwork and outride the toughest competition. You get on-the-fly 2WD/4WD with locking front differential, 11" of ground clearance and 10" of suspension travel to make any terrain bow down. Plus, the 100-lb. front and 200-lb. rear rack capacities do all the heavy lifting, so all you have to do is ride like there's no tomorrow.
